School leadership should first speak with Custodial staff about schoolyard maintenance. Custodial staff will complete needed tasks, contact Grounds, or place a work order with Planning & Engineering.

Planning & Engineering will address all repairs or replacements of schoolyard infrastructure and equipment.

All new design and capital work will be sent to Public Facilities Department.

Schools can contact Sustainability for schoolyard educational resources and connections, or assistance with the facilities maintenance process.

Schools can contact FOTBS for educational and training resources, as well as connections to funding, advocacy, and ideas.
